- By means of this Form, which replaces any previously issued notification concerning submission or transmittal of priority documents, the applicant is hereby notified of the date of receipt by the International Bureau of the priority document(s) relating to all earlier application(s) whose priority is claimed. Unless otherwise indicated by the letters "NR", in the right-hand column or by an asterisk appearing next to a date of receipt, the priority document concerned was submitted or transmitted to the International Bureau in compliance with Rule 17.1(a) or (b).
- (If applicable) The letters "NR" appearing in the right-hand column denote a priority document which, on the date of mailing of this Form, had not yet been received by the International Bureau under Rule 17.1(a) or (b). Where, under Rule 17.1(a), the priority document must be submitted by the applicant to the receiving Office or the International Bureau, but the applicant fails to submit the priority document within the applicable time limit under that Rule, the attention of the applicant is directed to Rule 17.1(c) which provides that no designated Office may disregard the priority claim concerned before giving the applicant an opportunity, upon entry into the national phase, to furnish the priority document within a time limit which is reasonable under the circumstances.

Even though the priority document was not furnished in compliance with Rule 17.1(a) or (b), the International Bureau will nevertheless transmit a copy of the document to the designated Offices, for their consideration. In case such a copy is not accepted by the designated Office as priority document, Rule 17.1(c) provides that no designated Office may disregard the priority claim concerned before giving the applicant an opportunity, upon entry into the national phase, to furnish the priority document within a time limit which is reasonable under the circumstances.

However, this does not apply where the applicant chooses an Authority other than this one to be the IPEA and the chosen IPEA has notified the International Bureau under Rule 66.1*bis*(b) that written opinions of this International Searching Authority will not be so considered.

If this opinion is, as provided above, considered to be a written opinion of the IPEA, the applicant is invited to submit to the IPEA a written reply together, where appropriate, with amendments, before the expiration of three months from the date of mailing of Form PCT/ISA/220 or before the expiration of 22 months from the priority date, whichever expires later.

**WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING
AUTHORITY (SEPARATE SHEET)**

International application No.

PCT/GB2004/004987

Reference is made to the following documents:

- D1: EP-A-0 636 397 (JUNKER-FILTER GMBH) 1 February 1995 (1995-02-01)
D2: GB-A-1 075 736 (POLYSIUS S.A.R.L) 12 July 1967 (1967-07-12)
D3: WO 2004/030790 A (MICRONICS, INC) 15 April 2004 (2004-04-15)
D4: WO 2004/000435 A (MADISON FILTER 981 LIMITED; ROBERT, BELL) 31
December 2003 (2003-12-31)

Item V:**1. Novelty and inventive step**

- 1.1 Present claim 1 is unclear in that the "pressure exerting means" are not sufficiently defined (Article 6 PCT). The term "means" only defines that at least something is present, which is able to provide a pressure, it is, however, not clear, whether these "means" represent a separate device, the form of the edge strip or the material thereof.

D1, which is considered to represent the closest prior art, discloses a filter cloth having an edge strip comprising an elongated body which fits into a corresponding groove in a filter plate (see D1, abstract). D1 further discloses a resilient material and special outer forms of the elongated body, which are able to provide a pressure for fixing the elongated body within the groove, accordingly "means" for exerting pressure are foreseen. Since these "means" for exerting pressure are of the same material than the whole elongated body, the subject-matter of independent claim 1 and of dependent claim 7 is not novel (Article 6 PCT).

- 1.2 Since the common concept to combine an engagement of a complementary part with additional pressure is already known, the subject-matter of the dependent claims which are directly dependent on claim 1 are not so linked as to form an inventive concept (Rule 13.1 PCT), since they define different solutions for different problems.

However, these solutions seem to be neither disclosed in nor suggested by documents D1 and D2

AUTHORITY (SEPARATE SHEET)**

2. Industrial application

The industrial applicability is obvious.

Item VI:

Certain documents cited

Documents D3 and D4 claim older priorities and will become relevant in the regional phase.

Item VII

Further deficiencies

1. The independent claims are not in the two-part form in accordance with Rule 6.3(b) PCT, which in the present case would be appropriate, with those features known in combination from the prior art being placed in the preamble (Rule 6.3(b)(i) PCT) and with the remaining features being included in the characterising part (Rule 6.3(b)(ii) PCT).
2. The features of the claims are not provided with reference signs placed in parentheses (Rule 6.2(b) PCT).
